

DVR: Picture in Picture (PIP)

What is Picture in Picture?

Your DVR allows you to watch two shows at the same time, with the built-in picture in picture (PIP) feature. The PIP buttons are located at the bottom of your remote control.

How to make it work?

1. Press the **ON/OFF** button and a small PIP screen comes up.

Tip: You will only hear audio from the main screen.

2. Press the **ON/OFF** button again and the PIP screen becomes bigger.
3. Press the **ON/OFF** button a third time to hide the PIP screen.
4. Use the **CH +** and - buttons to change the channel in this screen.

5. To change which show is in the main screen, press the **SWAP** button.

6. To change the location of the Picture in Picture window, press the **MOVE** button.

Tip: You can change channels in either screen, but you can only control the video action - like pause, rewind or record - in the main screen.

Use your Back button on your browser to return to Answers on Demand Home Page.
